SUMMARY

Enthusiastic and committed Computer Science Engineering graduate with a strong foundation in software development, problem-solving, and algorithm design. Skilled in Java, C++, and C#, with hands-on experience in application development using Unity and Android platforms. Adept at code analysis, optimization, and collaborating effectively within teams to deliver scalable solutions.

SKILLS

PROFESSIONAL

- **Programming Languages:** Java, C++, C#
- **Frameworks & Tools:** .NET Framework, Unity, ADB Tool
- **Development Areas:** Android Development, Game Development
- **Professional Skills:** Time Management, Effective Communication, Team Collaboration

WORKING EXPERIENCE

SOFTWARE ENGINEER

Advantest

2023 - 2024

- Enhanced application efficiency by working within the .NET framework (C#).
- Automated Android processes using the ADB tool
- Contributed to the design and architecture of new features, ensuring scalability and alignment with business requirements.

PROJECT

ANDROID APP

COLLEGE SPACE

- Developed an innovative mobile application designed to keep students connected and informed about campus activities. The app integrates multiple features to enhance engagement, communication, and accessibility for college communities.
- Key Contributions & Features:
 - Designed and implemented 60-Second Reels for quick, engaging content sharing.
 - Built a College News module to deliver real-time updates and announcements.
 - Integrated access to Free Courses to support student learning and skill development.
 - Developed a College Information Hub for streamlined access to essential campus details.

EDUCATION

- **HSLC (12TH)**
SKVM, Gummidipoondi
2018 - 2019
- **BACHELOR OF ENGINEERING**
Computer science & Engineering
TJS Engineering College
2019 - 2023

UNITY

SPACE PARKING – WINDOWS SIMULATION GAME

- Developed an interactive simulation game using Unity and C#, focusing on gameplay mechanics, user experience, and technical problem-solving. The project showcased strong skills in game development, system design, and feature implementation.
- Key Features & Contributions:
- Implemented music and sound controls to enhance player immersion.
- Designed a retry option for improved user experience and replayability.
- Created multiple landing points to diversify gameplay challenges.
- Built a final score system to track performance and encourage competition.
- Developed a fuel management system to add strategic depth.
- Integrated coin collection mechanics to reward exploration and engagement.

XO GAME – INTERACTIVE TIC-TAC-TOE

- Designed and developed a classic Tic-Tac-Toe (XO) game using C# and Unity, focusing on user interface design, logical algorithms, and engaging gameplay. The project demonstrates strong problem-solving skills and ability to implement core game mechanics.
- Key Features & Contributions:
- Implemented two-player mode with responsive controls.
- Designed an intuitive grid-based interface for smooth interaction.
- Developed win/draw detection algorithms to ensure accurate game outcomes.
- Added restart functionality for continuous play.
- Optimized code for performance and reliability across Windows systems.
